Dear LG Pathlab Team

May I take this opportunity to thank you for all your efforts and quality of service you have provided at such short notice. Your prompt reply to our backlogs crisis allowed quick resolution to the problem. You were able to come in the following day and report cases quickly and efficiently and again over the weekend. All cases were reported to a high standard. You were accommodating and flexible to our needs and we were able to work together to find the best way to report our backlog of cases.

It has been a pleasure to work with you. We would have no hesitation in using your service in the future.

Yours sincerely,

David Peston
